

## Three fires in one town stopped with extinguishers

WTOC.com (Burton, SC)

August 18, 2017

BURTON, SC - Over three consecutive days, Burton Fire officials were dispatched to three separate fires that were ultimately extinguished by bystanders before the fire fighters arrived. The first fire started in a school bus wheel well and was doused using the fire extinguisher that was on board. The bus was not carrying any passengers at the time of the incident. The second fire occurred in a J.C. Penney parking lot when a pickup truck's engine caught on fire. The driver immediately stopped and used the portable fire extinguisher he had to put out the flames. The final fire was caused by a malfunctioning window air conditioner unit in a home living room. The fire then spread to a nearby couch, but the home's resident cut power to the unit and used a fire extinguisher. Burton Fire officials are using the incidents to highlight the importance of every home and vehicle having a fire extinguisher. [\[Read more\]](#)

*"A little two-and-a-half-pound extinguisher can save your house."*

## Teen escapes hover board fire

## using family escape plan

KOIN 6 (Portland, OR)

August 30, 2017

PORTLAND, OR - A family of five was in their home when their newly purchased hover board burst into flames on the house's staircase. The family's sons were upstairs in their bedrooms, while the two parents were down stairs. The father quickly grabbed a portable fire extinguisher to put out the flames coming from the hover board. Meanwhile, the sons were following the family's emergency escape plan, which allowed the boys to safely climb down the side of the house using an emergency ladder. [\[Read more\]](#)

*"A sound fire safety strategy has to include portable extinguishers. They can extinguish fires during the incipient stage before they are large enough to trigger a sprinkler or other suppression system. This helps to protect against property damage and the buildup of dangerous smoke."*

- Joe Pierce, Retired Deputy Chief  
Dallas, Texas Fire Department

## Employees use portable fire extinguisher to halt fire

News Channel 25 KXXV (Temple, TX)

September 5, 2017

TEMPLE, TX - Employees of a Texas grocery store were able to use a portable fire extinguisher to put out a fire that had started in the loading dock. Temple fire fighters arrived at the loading dock area around 3:40 a.m. to find that the fire had already been extinguished by the store employees. Their fire investigation determined that the fire was started unintentionally from the heat of a trailer's clearance light against the door seal. Temple Fire and Rescue said the damage was confined to the door seal and that no one was injured by the fire. [\[Read more\]](#)

### **Fire Equipment Manufacturers' Association 101**

The Fire Equipment Manufacturers' Association is the premier trade association representing leading brands, and spanning dozens of product categories related to fire protection. The Fire Equipment Manufacturers' Association is comprised of four divisions represented by product categories: portable fire extinguishers, interior equipment, fire hose and pre-engineered suppression systems. These divisions work together in an effort to promote Layered Fire Protection, Life Safety and initial response when disaster strikes. Members of the Fire Equipment Manufacturers' Association have formed a subgroup, the Government Relations Committee (GRC), to address legislative and regulatory issues relating to portable fire extinguishers and pre-engineered systems. The GRC's main goals focus on helping to educate officials by advancing a layered fire safety philosophy that reflects the need for both sprinklers and portable extinguishers. This newsletter is published periodically to communicate to key members of the fire services and code officials on the importance of layered fire safety and the role that special application fire suppression systems and portable extinguishers play.
